

Heat Your Home Safely

32% of all House Fires are caused by Space Heaters

MORE HOME FIRES OCCUR during the cold winter months than any other time of year.

Make sure to follow these tips before you plug in.

PLACE space heaters on a flat, level surface, away from high-traffic areas.

PLUG a space heater directly into an outlet and avoid using an extension cord.

NEVER LEAVE space heaters unattended.

ONLY USE space heaters with the certification label of a nationally recognized testing lab.

DON'T USE a space heater if the plug is broken or the cord is frayed, worn or damaged.
